

What lies
beneath
behavior?

Underlying
*basic human
need?*

*Developmental
stage?*

Current state
of the *nervous
system?*

Survival
response:
*fight? flight?
freeze?
appease?*

*Coping strategy
that no longer
works?*

Structural
changes
in the *brain?*

How is this
“problem”
the child’s
solution?

Trauma-induced
*thinking &
conditioning?*
